

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

In presenting this, the seventh edition of the catalogue of Phi Delta Theta, I desire to make certain explanations regarding the plan of the book.

The chapter rolls are arranged according to their titles alphabetically by states. The members of each chapter are arranged in almost all cases under the years in which they were graduated or would have been graduated had they completed their courses.

In a few cases, Tennessee Beta for example, the members are marshalled under the years of their initiation. Again the members are arranged alphabetically under the different years, with the single exception of Tennessee Beta whose members are arranged throughout in the order of initiation. The names of members known to be dead are preceded by the asterisk (*) while the dagger (†) precedes the names of members who were connected with active chapters during the collegiate year 1905-6.

In the chapter rolls, names in full are given except in cases where members have requested that their own names be inserted otherwise and in a few instances in which full names have not been ascertained. Affiliates are enrolled in each chapter to which they have belonged. As the last catalogue enrolled affiliates only in their final chapter, it has been difficult in many cases to find the other chapters to which affiliates have belonged. An effort has been made to include degrees of members, but the list is incomplete. The profession or occupation of each member is given and in large cities, both business address and residence are shown.

Under the residence directory, the states and territories of the United States are arranged alphabetically, being followed by foreign countries, also arranged alphabetically. The cities under each state, territory or foreign country are in their turn alphabetically arranged, while in each city, the names of members are arranged in alphabetical order.

In the residence directory, members whose business is in one city and residence in another are listed in both cities, consequently the total number of names in the residence index will be found to exceed the number of our living members. The final division of the book is the alphabetical index of all names in the catalogue.

The present catalogue is supposed to contain the name of every member initiated prior to the end of the college year 1905-6. The advisability of including the members initiated in the fall of 1906

was considered, but it was found impossible to do so without too great delay. It will be possible to include the initiates of the present year in the latter part of the present edition by adding an appendix.

The membership of the fraternity as shown by this edition of the catalogue, is 14,525 of whom 13,201 are living and 1,324 are dead. The number initiated since last commencement time approximates 500. The total membership would, therefore, appear to be in excess of 15,000. However, a number of affiliates are counted more than once so that the actual number of members is probably about 14,500.

In closing the arduous task of editing and publishing the catalogue of Phi Delta Theta, I wish to thank all those who have so generously and so nobly assisted. Their names are too many to be enumerated here, but I beg to assure all who have contributed to the production of the catalogue that their services have been appreciated. Even the man who wrote a postal card to correct a single letter in the spelling of a name has contributed to the accuracy of this catalogue.

Chicago, November, 1906.

INTRODUCTORY NOTE.

The six previous editions of the catalogue of Phi Delta Theta have been issued in the years 1860, 1870, 1872, 1878, 1883 and 1894. Since the last edition was issued, more than twelve years have elapsed, a longer time than intervened between any other two editions.

A catalogue editor, or editors, was provided for by the constitution adopted by the Semi-Centennial National Convention in 1898, and that convention elected Louis J. Shlesinger and Frank E. Hullett as the first permanent catalogue editors. The National Convention of 1900 elected George H. English, Jr., and Charles F. Lamkin to the office. The National Convention of 1902 elected George H. English, Jr., and Edward E. Ruby. The resignation of the former was accepted in December, 1903, and the resignation of the latter was accepted in April, 1904. Thomas J. Griffin, Jr., was appointed sole editor of the catalogue in April, 1904, and the National Convention of that year elected him to the office. He resigned in February, 1906. All of these have done more or less work in collecting materials for a new edition, but the work has suffered greatly by reason of the frequent changes of editors and the consequent changes of methods.

In March, 1906, the General Council appointed Frank J. R. Mitchell, P. G. C., to have charge of printing the book. He decided to perfect the chapter rolls as much as would be possible without delaying the publication later than the National Convention appointed to be held in Washington, D. C., in November, 1906. For this purpose, he utilized data which he had secured in perfecting the alumni rolls which had appeared in the annual circular letters of chapters in 1905 and 1906, and he obtained further information from a large number of alumni. Where information could not be obtained directly from individual members, their classmates and chapter mates were besought to furnish data about them. Finally proof showing data concerning himself was sent to every living member of the fraternity at his last known address, with a request that errors be corrected.

The result has been that the chapter rolls have been materially corrected and this book is the result of patient, persistent work done in a comparatively short time.

To meet the demand for a condensed and inexpensive catalogue so that editions of the book may be more frequent hereafter than
